Requesting expanded carrier screening via Best Practice

A built-in template is available for our expanded carrier screening (Beacon) request form. Accessible within Best Practice, the form can be populated with patient details and printed using the same process as standard pathology requests.

Step 1

Open patient file. Click the Blank page icon or select File → New letter.

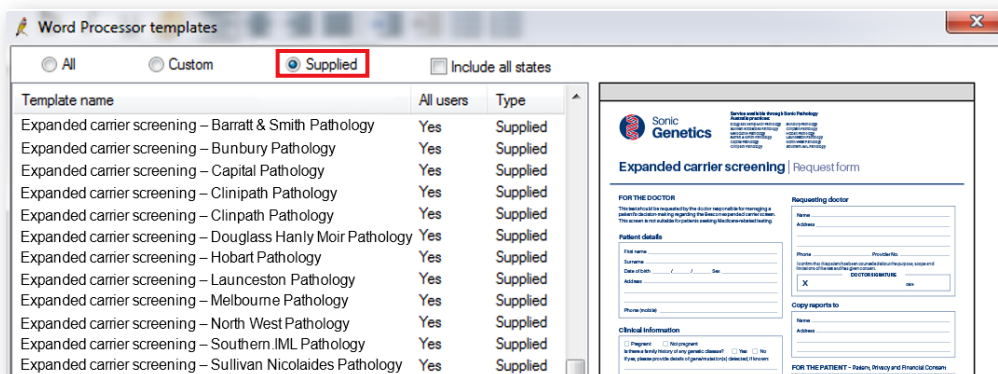

Step 2

Click the Page icon (with writing) or select File → New Document.

Step 3

Select radio button, 'Supplied'. Scroll down to expanded carrier screening and select your local Sonic Pathology laboratory.

Correct at time of printing. Any changes to the software made by the vendor may result in changes to the above procedure for utilising this template. For further assistance, please contact Client IT at your local Sonic Pathology practice.
