Your comprehensive genetic testing service

Sonic Genetics brings together the national and international expertise of Sonic Healthcare to provide doctors, patients and families across Australia with a comprehensive range of accredited genetic tests.

- **DNA relationship testing**: Defining the genetic relationship between people or tissue samples, using DNA markers.
- **Familial disorders**: Identifying the genetic basis of familial disorders that affect children and adults.
- **Genetic counselling**: Providing access to counselling services to assist in the management of genetic testing in families.
- **Immunology**: Analysis of genes modifying the risk of disease or responsible for familial disorders of the immune system.
- **Oncology**: Mutation analysis of cancers, to help clarify diagnosis, prognosis and therapeutic decisions in cancer care.
- **Paediatric disorders**: Childhood-onset disorders due to new cytogenetic abnormalities and inherited mutations.
- **Pharmacogenomics**: Analysis of genes involved in drug metabolism and hypersensitivity, allowing clinicians to prescribe with confidence.
- **Reproductive health**: Screening of couples prior to conception, or during early pregnancy, including non-invasive prenatal testing.

With the ever-increasing expansion of genetics and genomics across all facets of medicine, we are constantly reviewing available test options and building on our assay menu.

For a full list of our assay menu, please visit sonicgenetics.com.au
Our full-time genetic pathologists oversee all genetic testing and reporting nationally. They are available to discuss test selection or results by contacting Sonic Genetics on 1800 010 447.

Professor Graeme Suthers  
BSc (Med), MBBS, PHD, FRACP, FRCPA, GAICD  
*Director, Genetics, Sonic Healthcare (Australia)*

Professor Graeme Suthers is one of Australia’s most respected experts in the field of genetics. With an outstanding career and extensive experience in genetics, healthcare and research, Professor Suthers is nationally and internationally recognised for his expertise in genetic disorders, testing and clinical service provision. His goal is to provide genetic services of the highest quality and utility to patients, families and managing clinicians.

Dr James Harraway  
MB ChB, FRCPA, DPhil  
*Director, Genetics, Sullivan Nicolaides Pathology*

Dr James Harraway’s interest in genetics stems back to high school in New Zealand, when he was introduced to concepts such as round and wrinkled peas, and Punnet squares. After a few years working as a junior doctor, he learned about the (then) relatively new subspecialty of genetic pathology, and started his specialist training. Dr Harraway is interested in all areas of genetics and has particular expertise in inherited and somatic (oncology) genetic testing, and molecular cytogenetics.

E: james.harraway@sonicgenetics.com.au

Dr Melanie Galea  
MBBS (Hons), BMedSc (Hons), FRCPA (Genetics)  
*Director, Genetics, Douglass Hanly Moir Pathology*

Dr Melanie Galea is a medical and medical science graduate from the University of Sydney, and attained her FRCPA in Genetics in 2014. Her genetic pathology career has involved exposure to a broad range of molecular and cytogenetic techniques in Australian diagnostic public and private laboratories in New South Wales and Queensland.

Dr Galea is particularly interested in the application of massively parallel sequencing technologies to clinical medicine, specifically in constitutional paediatric and somatic solid tumour contexts.

E: melanie.galea@sonicgenetics.com.au

Dr Marina Berbic  
BMedSc, MBBS, MScMed [RHHG], PhD (Med), FRCPA (Genetics)  
*Deputy Director, Genetics, Douglass Hanly Moir Pathology*

Dr Marina Berbic has undertaken specialist training in genetic pathology at Prince of Wales Hospital and Douglass Hanly Moir Pathology. Dr Berbic is an Adjunct Senior Lecturer in the School of Women’s and Children’s Health at the University of New South Wales, a member of the Mackenzie’s Mission (Reproductive Genetic Carrier Screening) Variant Review Committee, and a member of the Splice ACORD (Australasian Consortium for RNA Diagnostics) Committee.

She has a particular interest in reproductive genomics and is passionate about integrating sequencing technologies in clinical decision-making and personalised patient care.
